Product Description

1219x2438mm 304 Stainless Steel Sheets 10mm Stainless Steel Embossed Plate

304L #4 is also known for its superior machinability and formability. This allows 304 steel to be stamped and deep drawn for a variety of applications, including sinks, saucepans, and other hollowware. Furthermore, its low yield strength and high elongation allow 304 to form all manner of complex shapes. It hardens rapidly, so after shaping it only requires air cooling, an important factor in its affordability and efficiency. If necessary, after spinning or forming it is possible to perform stress relief annealing or full annealing to your specifications.
